Project Proposal

Website Name- SleeveNotes

Description – a website designed for people that collect records to keep track of their personal collection. It will allow users to make an account and build a detailed inventory of their collection. The user will be able to keep track of information such as the artist, album name, release year, and genre. This will serve as a good and organized way for people to keep track of their library. The goal is to make a tool that will be easily and well-tailored to the needs of a record collector.

Pages-

My Collection- main dashboard

Add New Record

Record Detail Page

Wishlist

Statistics/Profile

Data Storage and viewing- The website will allow each user to manage their own private collection. Accounts with login security will be required. This ensures a user can only access their own data. The primary data is a list of records. Each record will have, recordID, UserID, artist, album title, Genre, condition of media, personal notes, and cover art.

Data –

Viewing – Users will view their records on the “My Collection” dashboard

Adding – users will add from the “add new” form

Editing – users will edit the details of any record at any time from its detail page

Removing – users will be able to remove their records from their collection
